RESEARCH AREAS

My research interests are graph deep learning, AI for science, trustworthy AI, and LLM for science. I am one of the authors of SubgraphX explaining the GNNs to human and GraphFM applying GNNs on large-scale graphs containing massive nodes and edges. Additionally, I am the author of QHNet and QH9, which facilitate the usage of equivariant graph neural networks for density functional theory (DFT). Recently, I join the project and propose Seq2Exp, a framework that uses large language models (LLM) while capturing the causal relationships between DNA and epigenomic data for gene-expression prediction, which is an oral paper from the ICLR.

EDUCATION

TEXAS A&M University (TAMU)

August 2020 - Present

Ph.D. in Computer Science Engineering; Advisor: Prof. Shuiwang Ji

University of Science and Technology of China (USTC)

September 2016 - July 2020

B.S. in Electronic and Information Engineering

EXPERIENCE

TEXAS A&M University (TAMU)

August 2024 - December 2024

Graduate Assistant Lecturer

CSCE 421-503: Machine Learning (course for undergraduate students)

Amazon Web Service (AWS)

June 2023 - August 2023 and June 2024 - August 2024

Applied Scientist Intern

Mentor: Dr. Xiang Song

Santa Clara, CA, USA

University of Sydney (USYD)

July 2019 - September 2019

Visiting Student

Advisor: Dr. Jing Zhang, Prof. Dacheng Tao

Sydney, Australia
